

Mathematics Department - University of California, Santa Barbara

Instructor: Schadeemann

Course: MATH
5A

Quarter: Winter 01

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on the back if necessary.

He is always prepared and very punctual. Organization a big strength.
also available for assistance.

Knows subject well!

Speaks Very Clear English.

only negative?

Homework due too early in week, usually a day after ~~part~~ part of
Subject matter is reviewed.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take it, etc.). Continue on the back if necessary.

Book is terrible - makes a bad 2nd place to look for help.

Poor Examples.

Course crams too much into 10 weeks.

Mathematics Department - University of California, Santa Barbara

Instructor: SCHARLEMAN

Course: MATH 5A Quarter: WINTER 2001

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on the back if necessary.

The instructor's teaching skills were alright. I wish he would do more examples than theory and distinguish between the different steps we need to go through for solving a particular problem. I think we just had a lot of material to cover so he rushed through.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take it, etc.). Continue on the back if necessary.

I thought 5A was pretty difficult. There is simply too much material that is thrown at us $\frac{1}{3}$ I don't know where it comes from or why we do what we do to solve these differential matrices equations.

Mathematics Department - University of California, Santa Barbara

Instructor: *Harold Schottenman II*

Course: *MATH 5A*

Quarter: *WINTER 2001*

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. Continue on the back if necessary.

On whole, very good, but he tends to start examples late in lecture, and doesn't get to finish. This makes it confusing because he rushes to finish, not explaining things well. Try to coincide lectures with homework assignments. Also it would be helpful to have homework due a day or more after discussion so we can get help on it in discussion.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take it, etc.). Continue on the back if necessary.

Text book is no good. Also I think more time needs to be spent on Matrices + Linear Algebra, it was a bit rushed

The instructor was well prepared for his lectures and presented the information clearly. He was open-minded with questions and had a helpful approach to them. He was lacking in one area: stimulating interest in the subject. Some variation in the way information was presented would be helpful. Overall, he was fair in grading.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take it, etc.). Continue on the back if necessary.

This course seemed to pack in too much information for the time allotted. This was really hard, because too much information was presented and needed to be grasped in too little of a time period.

Mathematics Department - University of California, Santa Barbara

Instructor: Schorkmann

The prof is good the best I've had here. Doing about as well as can be expected with the crappy course. There is an awful lot of him in this class though. And it's very hard to do it all well when the students are just trying to get something down for each problem.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take it, etc.). Continue on the back if necessary.

The course is WAY to short for this. I beg the math dept to slow this down some. I pity the next group who take this class, who will no doubt go even faster than this one.

Mathematics Department - University of California, Santa Barbara

Instructor: Scharlemann

Course: Math 5A

Quarter: Winter 2001

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on the back if necessary.

Strengths - give examples, speaks coherently, boardwork is neat & readable
Weakness - sometimes doesn't explain concepts clearly
difficult

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take it, etc.). Continue on the back if necessary.

The textbook doesn't help in explaining the concept. The linear algebra in two weeks is too short to grasp.

The TA was very helpful (Jeff Miller)

Mathematics Department - University of California, Santa Barbara

Instructor:

Scharlemann

Course:

Math 5A

Quarter:

Winter 2001

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. 1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on the back if necessary.

It's a little hard to understand the instruction. Nonetheless, the instructor is fully prepared to teach.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take it, etc.). Continue on the back if necessary.

The book is the worst book ever. It's really hard to understand because it doesn't really explain how to solve certain problems; instead, it gives a blob of words to describe how to solve problems. Moreover, the course goes too fast on certain subjects like matrices.

Mathematics Department - University of California, Santa Barbara

Instructor: Scharlemann

Course: Math 5A

Quarter: Winter 01

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. Continue on the back if necessary.

Prof. Scharlemann is an excellent lecturer - by far the best in the math dept. that I have encountered thus far. His preparedness and enthusiasm is unparalleled. Very easy to understand. It would be nice if the homeworks were due 3-4 days after he finishes lecturing on the subject matter.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take it, etc.). Continue on the back if necessary.

everything is wonderful except for the speed at which we race through matrices.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on the back if necessary.

The profesor gives good quality lectures and solid examples. His only weakness is his lack of step by step instructions, he will generally leave clarification for the TA who has only 1 hour each week to cover 3 hours of lecture. Further, ~~the~~ discussions should be later in the week so students have more time to prepare questions and homework.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take it, etc.). Continue on the back if necessary.

The course is very poorly designed. An extra quarter at least should be spent on linear algebra ~~techniques~~ techniques and we students had no chance to try to understand the fundamental proofs behind what we ~~we~~ did.

Mathematics Department - University of California, Santa Barbara

Instructor: Marty Scharlemann

Course: Math 5A

Quarter:

Winter 2007

Continue on the back if necessary.

Scharleman did a good job with the course. I feel that he was thorough in his explanation of the course. As always he was well organized & prepared for each lecture. He did seem to move much more quickly & it was hard to grasp all the material at once. He also assumed students knew more than we actually did when it came to matrices. I don't feel this was really his fault though, so overall I feel he did a great job.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take it, etc.). Continue on the back if necessary.

As for the course, there was fair to much material to cover for the time. Consider cutting back so we can actually understand the material rather than just get the "gist" of it.

Mathematics Department - University of California, Santa Barbara

Continue on the back if necessary.

The instructor is extremely knowledgeable in this area of teaching. He presented lectures clearly and explained the material in a concise manner. He was enthusiastic about teaching, always prepared and on time. It was one of the best math classes I have taken, mostly due to the professor's presentation of subject matter (he made it interesting & I consequently learned a lot).

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take it, etc.). Continue on the back if necessary.

One note - the book was very unclear. It did not follow standard notation a lot of the time and was cloudy when discussing certain topics. It makes the professor's job that much harder when he has to teach from a book like this.

Mathematics Department - University of California, Santa Barbara

Instructor: Scharleman

Course: Math 5A Quarter: W01

These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on the back if necessary.

The grading is a bit hard on some concept questions of the exam.

Overall is good.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take it, etc.). Continue on the back if necessary.

The textbook really sucks, should try to find a better text to replace this. The text doesn't teach you how to solve the problem, they just assume you got a PhD and know how to do it. It would be better if the text has more "in depth" detailed examples.

Mathematics Department - University of California, Santa Barbara

Instructor: Martin Schardemann Course: Math 5A Quarter: Winter

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on the back if necessary.

good instructor very prepared, great TA.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take it, etc.). Continue on the back if necessary.

The textbook is horrible. Not nearly enough explanation.

Mathematics Department - University of California, Santa Barbara

Instructor: Scharlemann

Course: Math 5A

Quarter: Winter 07

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on the back if necessary.

Professor Scharlemann is in my opinion a very good teacher. He explains everything very clearly and precisely. He does example problems for everyone and has no problem stopping to answer a question for a student. He could go into more depth of what is required for the homework.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take it, etc.). Continue on the back if necessary.

Basically the text we are using is terrible. I think the department should get new books + labs are easier to understand and learn from outside of class

Mathematics Department - University of California, Santa Barbara

Instructor: Scharmann

Course: SA

Quarter: W01

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. He was a much better teacher this quarter.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take it, etc.). Continue on the back if necessary.

The K and A textbook is horrible. You cannot understand the examples or the concepts that they are trying to convey. I recommend the dept change the book. The course has to cover too much material and it is hard to comprehend so many topics.

Mathematics Department - University of California, Santa Barbara

Continue on the back if necessary.

The professor's knowledge of the material was very helpful. He tended to lose concentration and effectiveness towards the end of the quarter, though. The TA Jeff is an excellent math instructor and would convey more information than necessary: clearly and effectively.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take it, etc.). Continue on the back if necessary.

There was a lot of work compacted into one-quarter. Made it difficult to fully grasp the material and not just memorize equations.
